DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Boeckle et al. (3999406).

As seen in figures 3 and 5, the disclosure of Boeckle et al. (3999406) teaches the invention as claimed including a body (3) having a knitted section (8) with a plurality of first yarns (11) in a knit direction, said body having an opening, wherein said body has an edge (7) between said knitted section and said opening, said edge having a plurality of second yarns (13) being located therein, said plurality of second yarns being elastic and providing a tension at said edge when worn on a human body. Re claim 8, note the aperture has a circumference as seen in figure 5.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
